DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, 11, 13-18, and 27-44, drawn to a printing device and a method for writing, classified in class 347, subclass 111.
 - II. Claims 45-50, drawn to an electronic paper, classified in class 430, subclass 37.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I (claims 1-9, 11, 13-18) and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require a solvent as claimed in the subcombination. The subcombination has separate utility such as functioning in a apparatus that does not include a drum-shaped head.

Inventions Group I (claims 27-44) and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, Group II has separate utility such as functioning in a printing device that does not comprise a

head having a curved part or being configured as a rotary drum. Group II is also capable of functioning in an apparatus that does not include an electric field for resetting a pre-written pattern. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Bryant Wade on 8/26/2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
